

Build more safety into your pipeline project from top

to bottom.

Safer

Better traction surface
No cable loops or chains
Safer lifting design

Easier to Handle

Lighter than wood
Faster installation
Won't float

More Durable

Synthetic material
UV rated
3-ply laminated
Bolted, not nailed

A safer right-of-way with ECOMats.™ That's the mark of Tiger.

When Tiger ECOMats cover your worksite, you're really covered – entirely. For starters they're much safer than common mats, with a high-traction, slip-preventing surface and a synthetic 3-ply bolted construction that eliminates rotted boards, splinters and nails from your right-of-way.

ECOMats ECOMats are practically indestructible while still being light and compact at 8' x 16'. So they're easy to transport, install and move forward to be used again and again as your pipeline progresses. Plus they're easy to clean and won't absorb chemicals. Compared to wood and composite, ECOMats are simply a better way, in every way. Don't put up with the problems. Put down ECOMats.

Make it happen.
