

# To make your project succeed, build it on the best foundation.

## Safer

- No broken boards
- No cable loops or chains
- Safer lifting design
- Static inhibited

## More Durable

- Synthetic material
- UV rated
- 3-ply laminated
- Bolted, not nailed

## Better for Environment

- No fluids absorbed
- Easily cleaned
- Less solids buildup

## The safer, tougher ECOmat.™ That's the mark of Tiger.

High-stakes drilling and frac operations should have highly superior ECOmats beneath them. They put your people and equipment on solid footing with a high-traction, no-slip surface. Measuring 8' x 16', they are safer, lighter, stronger, easier to work with –

**ECOmats** and much more durable. Synthetic ECOmats also form a firm foundation for your environmental program, because they won't absorb chemicals or biodegrade. Simply, they are better than standard mats in every way. Don't live with the multitude of problems common to wood and composite mats. Instead, build success into your project from the ground up. Install ECOmats.

*Make it happen.*
