

# The road to project happiness is paved with ECOmats.

**Now, a heavy-duty mat that is safer and easier. That's the mark of Tiger.**

Put Tiger ECOmats™ on your right-of-way and take your pipeline project to a much better place. Synthetic ECOmats solve the many problems common to wood and composite mats. A high-traction surface keeps your people and equipment from slipping. The lightweight, compact design is easy to offload, lay down, upload and move as your pipeline advances. ECOmats are stronger than wood and won't absorb chemicals, or decay over time, or leave nails and splintered boards on your right-of-way. They just keep performing, year after year after year. Take the safer and easier road on your next project. Insist on ECOmats.

## ECOmats

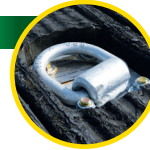

### Safer

- High-traction surface
- No cable loops or chains
- Safer lifting design

### Easier to Handle

- Lighter than wood
- Faster installation
- Won't float

### Longer Lasting

- Synthetic material
- UV rated
- 3-ply laminated
- Bolted, not nailed

*Make it happen.*
