THE ROAD TO SUCCESS IS PAVED WITH ECOMATS

Reliable and long-lasting ground protection is essential for safety on the job. At Tiger, our goal is to help you achieve just that.

Tiger understand what it takes to create a firm foundation for industrial worksites. With our best-in-class customer service and advanced technology, we provide the most innovative ground cover in the industry. From site planning and installation, to superior safety and environmental compliance, we guarantee you will get the results you need with Tiger ECOMats™.

KEY BENEFITS

Designed to Improve Traction

During the final stages of manufacturing, Tiger's ECOMats™ are "seared" with a slip resistant pattern into the top of the planks. This greatly improves traction over wood and other composite mats when dry or wet.

Increased Savings

Tiger can ship 14-16 ECOMats™ per truck load significantly reducing shipping costs. Unlike wood mats, ECOMats™ have a compact design to prevent mud and debris build-up between segments. During freight out, this prevents extra weight costs and reduces cleaning fees.

Minimal Liquid Absorption

ECOMats™ decrease chemical transference and will not soak up a lot of toxic liquids. They pass the "WIPE TEST" with a .05% absorption rate. When properly cleaned, ECOMats™ can safely leave a project site virtually contaminate free.

ECOMATS™

SPECIFICATIONS:

- **Dimensions:** 8' x 16'
- **Weight:** 2,950 lbs (+/- 2%)
- **Coverage:** 128 sf of coverage per mat
- **Material:** 3 ply mat with steel runners

Ecological

Proof Tested & Load Rated

ECOmats™ have a load bearing weight in excess of 1,000 psi. They load, offload, lay, and move easily with a forklift or by (2) galvanized D-rings. The lifters are load rated to 4,000 lbs in a pair and approved for overhead lifting according to ASME B30 lifting standards.

Class B Fire Rated

ECOmats™ have an ASTM E84 Class 2 or B Flame Spread Index (FSI) 25-75 rating. An ideal mat solution for welding and highly flammable worksites.

Safer than Conventional Mat

Tiger ECOMats™ prevent tripping hazards due to the following safety features:

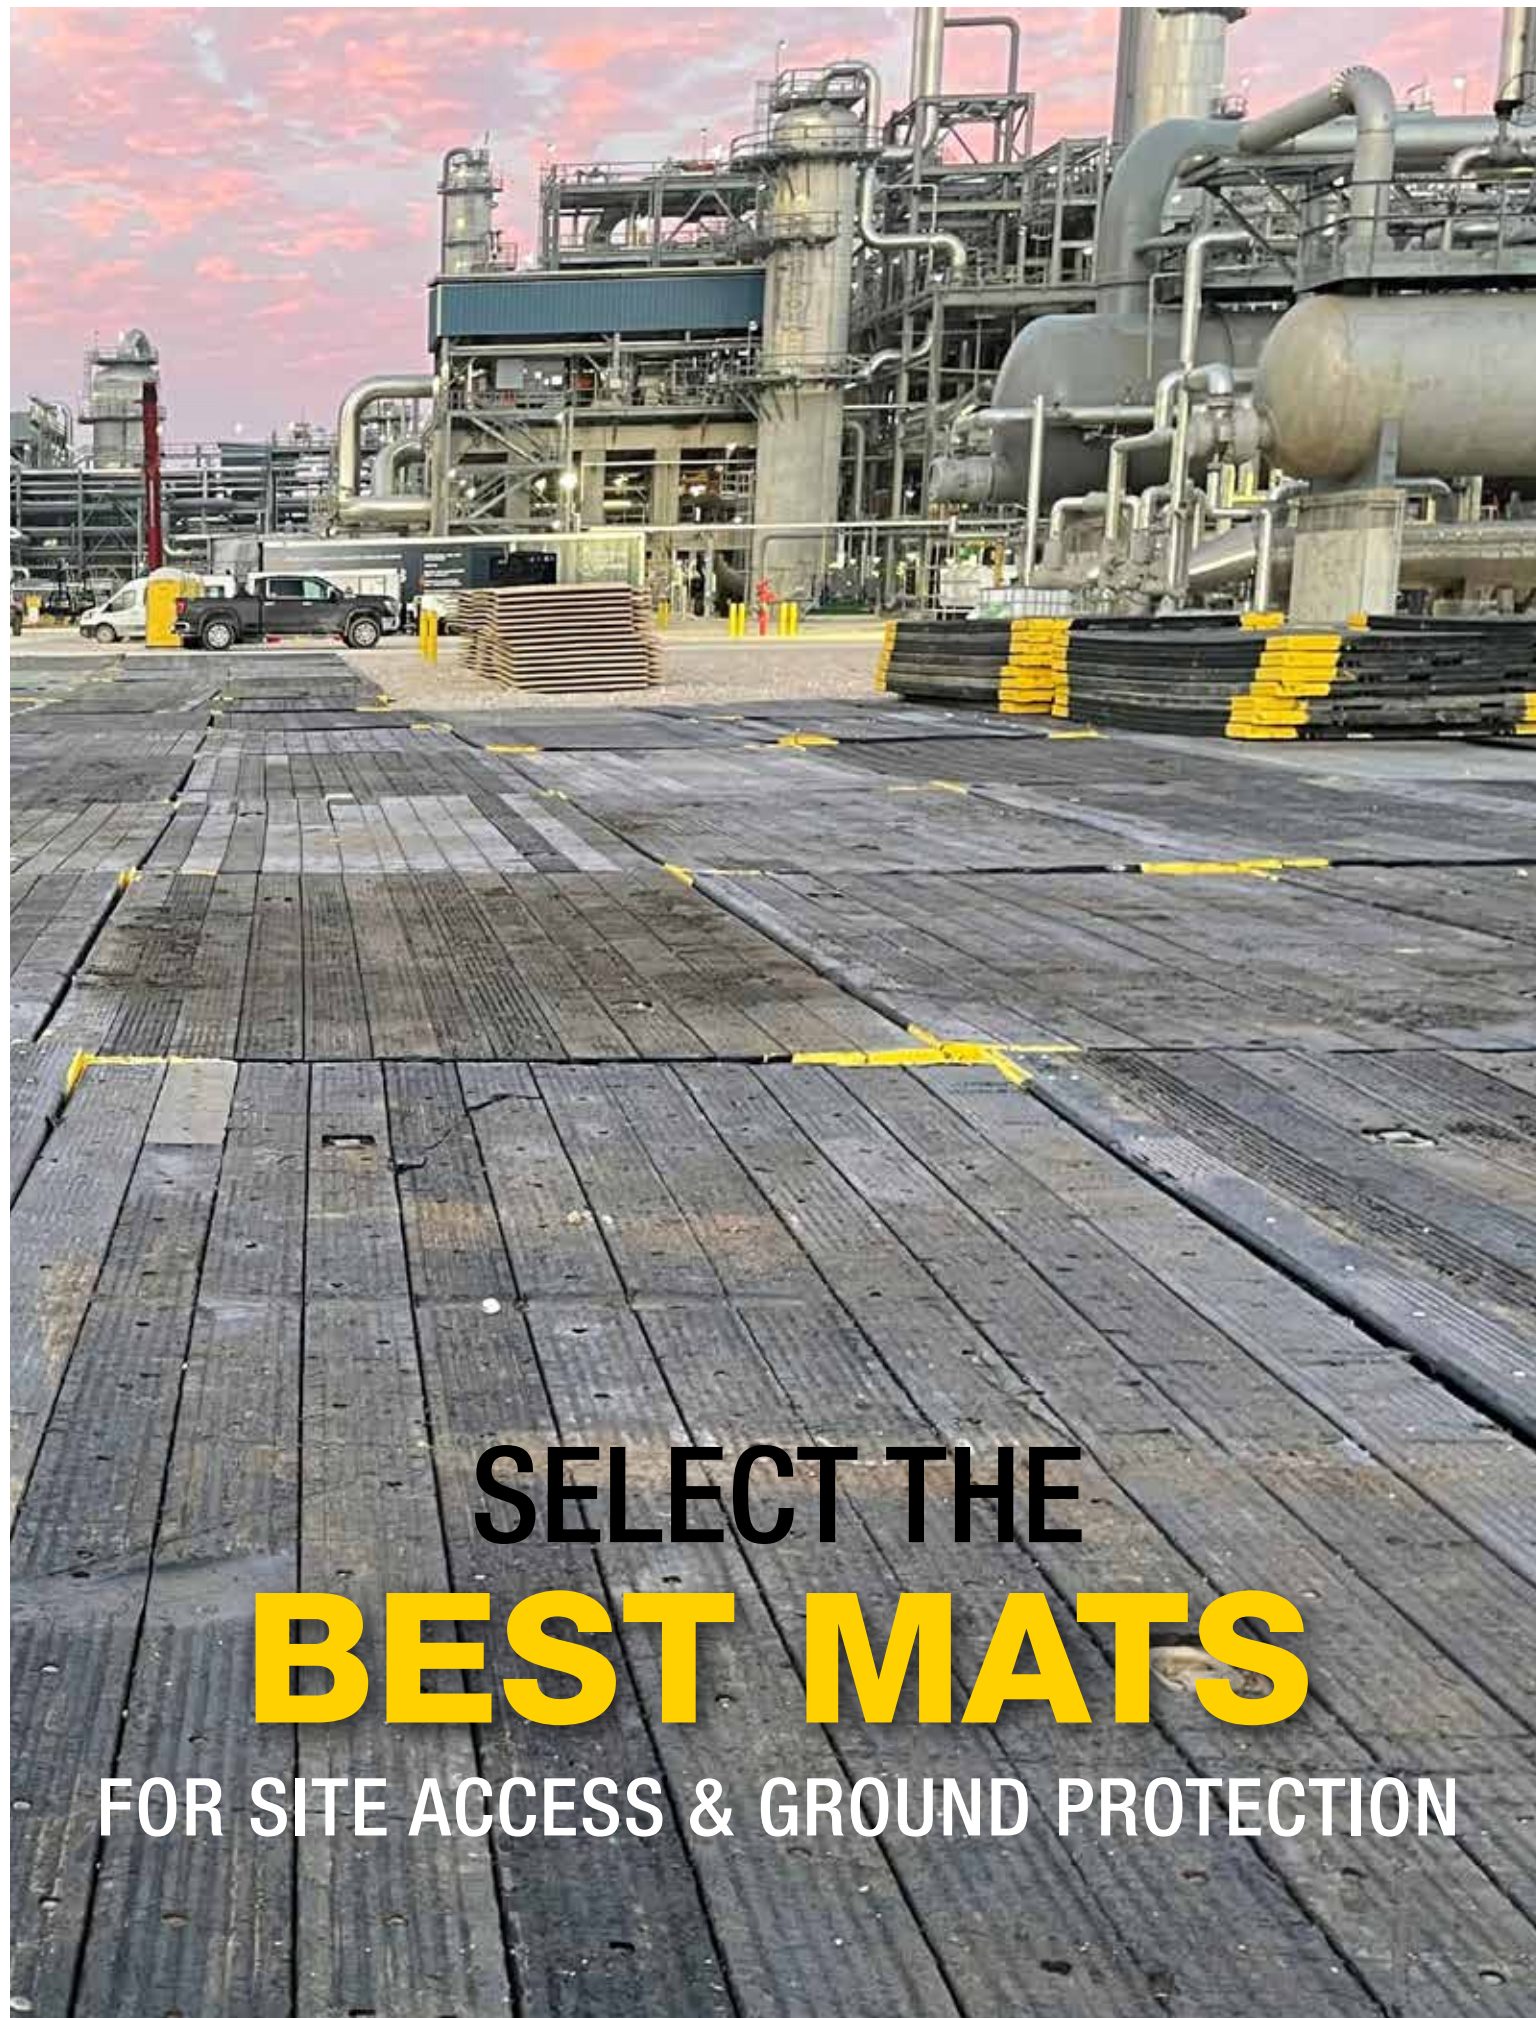

- Recessed D-rings
- No gaps or broken boards
- Tightly spaced panels
- No chains or cable loops
- All bolted
- No nails to puncture shoes or tires
- Anti-static inhibitors

Reduce, Reuse & Recycle

Environmentally driven, ECOMats™ are made up of 60% recycled material and non-organic fillers with UV inhibitors.

- All materials are 100% recyclable
- High reuse rate to reduce ecological footprint
- Chemical absorption rated at .05%
- Less solids buildup and easily cleaned
- No trees are cut down to manufacture

**SELECT THE
BEST MATS**
FOR SITE ACCESS & GROUND PROTECTION

ECOmats™ provides temporary ground cover solutions for multiple types of job sites.

TARGET MARKET

- Drilling Oilfield Sites
- Oilfield Service Companies
- Frac Sites
- Completion Sites
- Tank Farms
- Refineries
- Chemical Plants
- Integrity Pipeline Work
- Pipeline Construction, Rework and Testing
- Right-of-Way Construction
- Crane Companies
- Commercial Construction
- High Line Industry
- LNG Facilities
- Access Roads
- Train Derailments
