Water Mitigation & Remediation

At Tiger, our team of experts have worked on every major hurricane in the Gulf Coast. We have also provided equipment and services to address fires, explosions, chemical spills and more for the past 10+ years.

PUMPING SOLUTIONS

Tiger has the ability to offer a broad range of pumping solutions in the aftermath of a storm. Whether you need de-watering or your water supply is down, Tiger has the pump you need. Our pumps are used in a variety of applications for energy, industrial, construction and emergency response industries.

Our team of experts have a solid history of solving the most challenging pumping projects under the most extreme circumstances. Tiger has a vast fleet of pumps ready to deploy at any given moment. From large self priming pumps to 60 - 600 horsepower pumps, we have the right equipment and accessories to help you move water and liquids quick and efficiently.

CLEANING SOLUTIONS

Tiger is a trusted name in providing cleaning equipment such as pressure washers and hydroblasters to assist with restoration.

Power Generation & Fuel Supply

POWER SOLUTIONS

Tiger delivers power to some of the most remote locations across the globe. When the power is down or just not available, Tiger Rentals can get you going with our extensive line of generators, light towers, fuel tanks, transformers and other power accessories.

FUEL SOLUTIONS

If it needs fuel, we make sure it gets fuel. Fuel supply and storage is mission critical. Without fuel, generators and other equipment are dead in the water. Tiger Rentals offers many fuel solutions.

Tiger Rentals has a wide range of container options to store and transport fuel, including:

- Gasoline
- Diesel
- Natural Gas
- LNG

Ground Cover

ECOMATS™

The much safer, much tougher synthetic mat. ECOMats™ were designed to provide temporary stability and improvement of ground conditions for upstream, midstream, downstream and construction projects.

Built with a segmented [non-hollow core], the synthetic ECOMat™ addresses structural needs and dramatically improves project foundations. Environmentally driven, it decreases chemical transference, improves safety traction and reduces the need to cut trees for temporary matting.

ECOMats™ are a great solution for base camps:

- With rainy conditions, they help to prevent mud from getting into tents and buildings.
- They are a great resolution for temporary roads, sidewalks and foundations.
- ECOMats™ are heavy-duty and do not float.

SPECIFICATIONS:

- 8' X 16' - 3 ply mat with steel runners
- 128 sq. ft. of coverage per mat
- [2] recessed D-rings
- Weight: 3,000 lbs

RELIABLE & DEDICATED

At Tiger, we take your needs very seriously and are dedicated to exceeding expectations in all that we do. We know that every minute is mission critical in emergency response situations so we've built our company to come through for you, when and where you need us.

Our years of experience and logistics connections allows us to go where others will not or can not venture. We are your first responders and will do what it takes to **MAKE IT HAPPEN.**

Disaster Relief Base Camps

TURN-KEY SERVICES

Get everything you need from one source.

Tiger does it all so you can focus on your operations. With our disaster relief program, our team of experts work with you to create a customized plan for your temporary operations.
